The collection aims to fit into the product categories offered by the studio, resonating with the aesthetics and design language as that of the products that the studio caters to.

Theme Board

Image source: in.pinterest.com

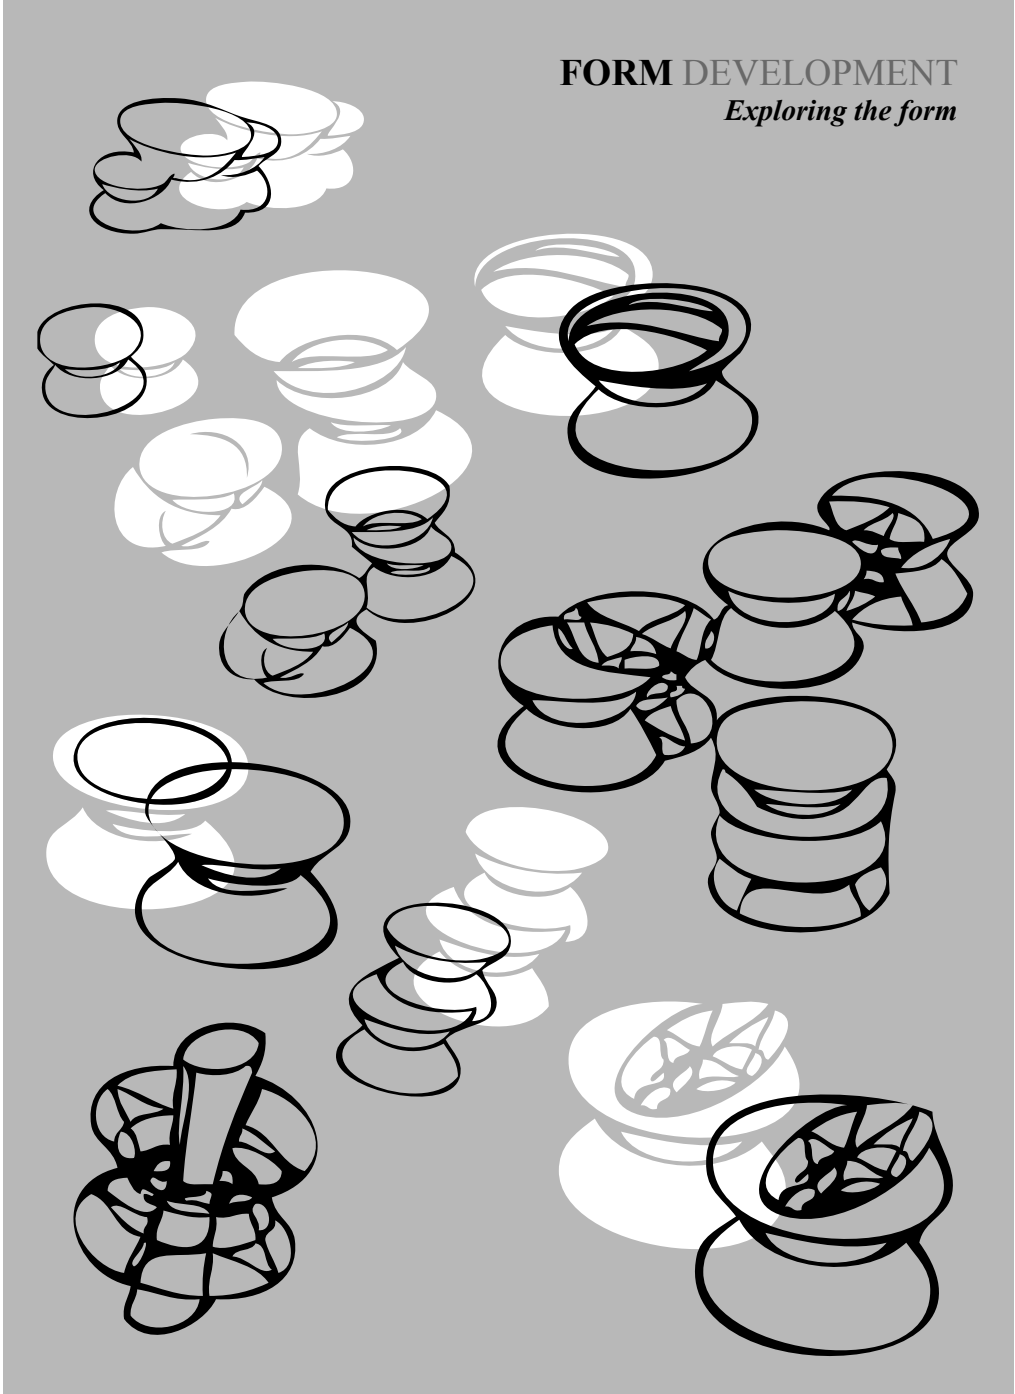

The structural breakdown is the core for the form development of the products which mainly comprises of two cones and a structure made by the strings on the outer surface of *dumroo*.

CONCEPT Development

Giving thoughts a direction

- The studio works on the principle of threading the historical and the cultural through a modern lens.
- *Dumroo* is the only remaining form of hour-glass drums which are seen in ancient Indian statues.
- **This collection displays a connection of the form of *dumroo* with the theme of boolean defining the visual vocabulary as modern.**

FORM DEVELOPMENT

Exploring the form

Sketch on paper
