

VIRA

TRANSFORM

AND TURN

Category: Associate Degree-
Bachelor's Degree Students
Category / Furniture

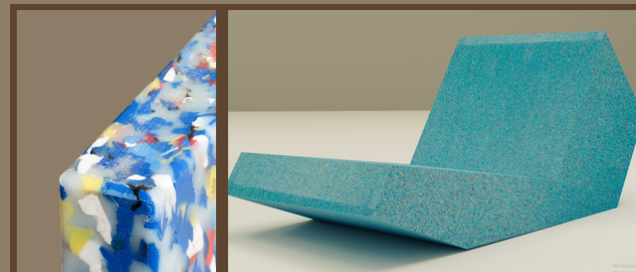

Suggested Name for the
Design: Vira (In Italian, it
means to turn or rotate.)

Materials to be Used in Production:
Recycled plastic terrazzo
composite
FSC certified plywood / natural
wood

RECYCLED PLASTIC
OPTIONS

Thanks to different types of plastic and
color combinations, the product can be
manufactured in a variety of color options.

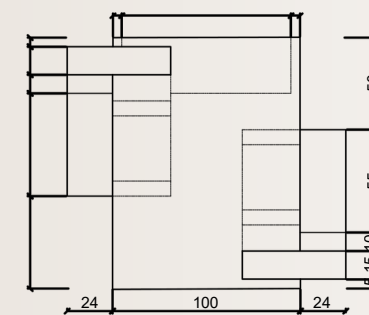

Design Concept and Basic Principles: Vira
combines reading and relaxation functions in a
single sustainable piece of furniture. Its
ergonomic and simple design offers the user a
comfortable experience.

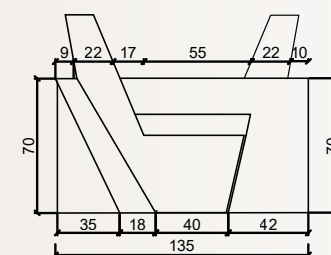

**Product Suitability for Export, Packaging and
Transportation:** Thanks to its interlocking
design, the product can be packaged more
compactly, providing a volume advantage
during transportation. If needed, the table can
be designed to be produced in a disassembled
state, thereby increasing transportation
efficiency in logistics processes.

Production Techniques: The table will be
produced by assembling wooden panels cut
using CNC technology. The chairs will be
produced by shaping recycled plastic material
into a single piece using a molding method.
